## MARTIN JETPACK FLY THE DREAM

The Martin Aircraft Company V4 engine was developed from the ground up as an aircraft engine to power the MARTIN JETPACK

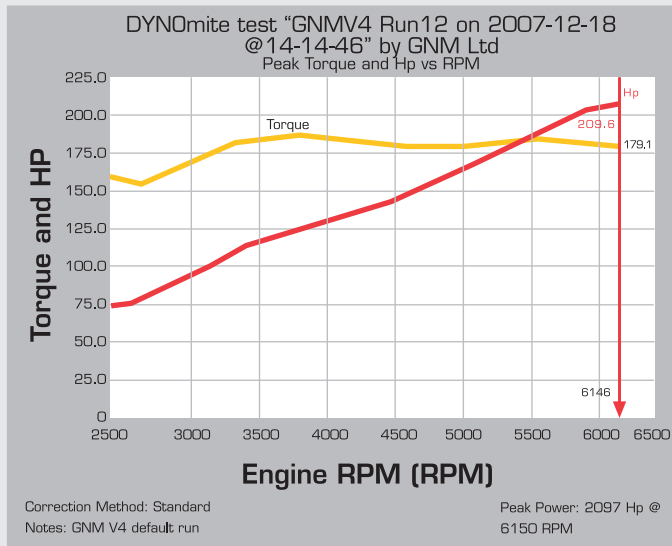

After searching the world for a suitable engine, and coming up short, Martin Aircraft assembled a team of experienced engine designers and reliability experts from around the globe.

The engine has several key features.

- > High power to weight
- > High reliability
- > Low revving
- > Low vibration
- > Flat torque curve

*fly the dream*

### Specifications:

Type	V4 two stroke
Displacement	2.0 litre (122 cu in)
Bore	89 mm (3.50 in)
Stroke	79 mm (3.11 in)
Nominal Performance	200 hp @ 6000 rpm.
Torque	>180 ftlbs 3500-6000 rpm
Features	Sequential fuel injection, Duel CDI ignition,
Generator	360 W, 12V
Weight	132 lbs (60 kg)
